

What do you enjoy most about your Geography Lessons?

Tommy - Y5

I enjoy the themes that we study in school such as World War Two and North America

Shay - Y6

I like finding out about the world.

We can look at different places and discover facts about where we live - that is the best!

As I've progressed through school I've always enjoyed finding out about different countries, the cultures and traditions.

I like finding countries I never knew existed and learning about their culture.

## Describe your favourite Geography Lesson?

Tommy - Y5

I really enjoy finding out about influential people such as Winston Churchill, he helped to shape the World after the war.

Shay - Y6

I really enjoy being able to complete independent research about different geographical facts.

When I find out things for myself, I remember them best so these are the lessons I prefer.

My favourite Geography lesson is when we use a map or an atlas to investigate different countries and cities of the world. I like looking for the highest mountains.

Jake - Y4

Imogen Y2 - Y

The globes in Year 2 are really good because we can take them apart and then put them back together, it helps me remember where places are.

How do you think Geography lessons could be improved at Wren's Nest Primary School?

Tommy - Y5

We do loads of different activities in school and go on trips but it would be fantastic if we could visit a different country

We could include using maps to find out where we could go, like making directions.

We could plan to go on a school trip somewhere and make a map of how we could get there and the journey to follow.

Shay - Y6

It would be great if we could include more interactive activities. I use Geoguesser at home, it is a geography game based on Google Maps.

I enjoy working with the devices we have in school so it would be great to use them more often during geography lessons.
