What do you enjoy most about your Computing Lessons?

I like it when we use PowerPoint. We get to use our very own Google Chrome Book.

Joanna – Y6

Riley – Y1

I like using the iPad.

We can use them on our own or with the teachers.

I make stories on it.

We have lots of variety of learning. We were learning about coding last term. It's lots of fun. It is the future of technology.

Ndala – Y5

George – Y4

We use laptops in Year 4. We use them for TT RockStars and lots of other things.

Describe your **favourite** Computing Lesson?

I enjoy computing when we use technology across all the lessons like in Maths, History and Literacy. We use it for research sometimes.

Joanna – Y6

George – Y4

In Year 3, we used them for cross curricular learning. We used laptops for researching different plants within Science.
We then used the Microsoft Word programme to create an information document all about plants.

Riley – Y1

I love making presentations using Google Slides.
I made one about Space. I like the fact that Miss showed us how to edit slides and create transitions.

I like it when I make stories.

I know how to save them myself now so I can show it to my friends.

Ndala – Y5

How do you think Computing lessons could be improved at Wren's Nest Primary School?

Improving the broadband speed would be good.

Joanna – Y6

Riley – Y1

We could take photos ourselves of our work.

I would like to make more presentations as information slides. I could do it in my own time.

Also, maybe more charging station for the computers?

Ndala – Y5

George – Y4

Maybe, we could use PowerPoint in Year 4 to create a History information presentation about 'Stones and Bones.'
