

Science- Let's Grow!

Key Vocabulary

Wild plants	A wild plant seed grows where it falls. It doesn't need to be planted or cared for as it grows.
Garden plants	Garden plants are plants that people choose to grow in their gardens.
Weed	Weeds are wild plants that grow in places where people don't want them.
Deciduous	A deciduous tree loses its leaves each year.
Evergreen	An evergreen tree keeps its green leaves all year round, even in the winter.

Do all trees look the same all through the year?

The leaves of a Horse Chestnut Tree are separated into 5 parts.

In the Autumn, they drop seeds called conkers.

Daffodils

Tulips

Roses

This is an Oak Tree.

You can easily recognise it by looking at its leaves and acorns.

These are Silver Birch Trees.

They are easy to spot because of their unusual bark

Key Vocabulary

Roots	Roots take in water and nutrients from the soil.
Stem	The stem holds the plant up and carries the water and nutrients from the roots to the leaves and flowers.
Leaves	Leaves catch sunlight to make energy.
Flowers	Flowers attract insects and birds.

Petals	Petals are the colourful part of the flower.
Fruit	Fruit contains the plant's seeds. Sometimes humans try to grow fruit without seeds because it's easier to eat.
Seeds	Seeds grow into new plants.
Bulbs	Bulbs grow into new plants..
