

What do you enjoy most about your Science Lessons?

I like learning about forces and magnets. I like doing cool experiments with soil. My favourite experiment is elephant toothpaste!

Jake - Y3

Braidy - Y4

I like that we are learning about adaptation and how camels' humps hold fat and not water. It's fun to learn new facts.

I like doing experiments with my friends, like when we did the digestive system, we used a banana and tights. It was fun!

Maya - Y6

Oscar - Shooting Stars

We do different things each week. We do sorting, cutting and making things like arms and we do experiments.

Describe your favourite
Science Lesson?

I liked when I got to work with my friends doing experiments with rocks and soils. We tested all of the properties of the rocks.

Jake - Y3

Oscar -
Shooting Stars

I like all my Science lessons, especially when we made a muscle with our partners. We used cardboard and elastic bands.

Braidy - Y4

My favourite lesson was when we found out all about adaptation and animals. It was really interesting as I learned lots of new things.

My favourite lesson was when we tested the shell of an egg, which was supposed to be the enamel on our teeth. We put the eggs in vinegar, water and cola. We put toothpaste on some too!

Maya - Y6

How do you think Science lessons could be improved at Wren's Nest Primary School?

Nothing because Science is amazing! We get to do lots of things.

Jake - Y3

Oscar - Shooting Stars

I would like to do more experiments on my own.

Braidy - Y4

I would like to do even more Science at school. We should do it more than once as week!

They are already really good. Maybe we could get more books for us to look at in the classroom!
