

Under the Sea

&

Let's Go Round Again!

Key Vocabulary:

Ocean	Vast bodies of saltwater that cover most of Earth's surface.
Continent	Large, continuous landmasses.
River	A large, natural flow of water that moves across the land.

The Earth is the name of the planet we live on. It is made up of oceans and continents.

Oceans

The Earth is made up of 5 oceans:

Pacific- the largest ocean.

Atlantic- between Europe and USA.

Indian- the warmest ocean.

Southern - at the bottom of the Earth

Arctic- the coldest ocean- lots of ice!

Continents

The earth has 7 continents:

Asia

Africa

North America

South America

Antarctica

Europe

Australia

- Oceans are home to millions of creatures.
- The earth is 70% ocean water.
- All of the continents of the world could fit into the Pacific ocean.

Where do we live?

We live in England, this the UK, this is part of the continent, Europe.

Rivers

Source	Where the river starts
Mouth	Where the river ends
River	A natural stream of water flowing to the sea.

- Many rivers start high up in hills or mountains.
- This is where its source is found.
- There are a few different types of river source.
- It can be a lake, a bog, rainfall or a spring.
- The flow of the water slows as a river twists and bends.

Famous rivers around the world:

- Amazon River**- Carries the most water
- River Nile**- Longest river in the world.
- Zambezi river**- in Africa, home to crocodiles and hippos

Seasons

Seasons	The 4 parts of the year sectioned by weather patterns.
Weather	The conditions outside.
Temperature	How cold or hot something is.

In the UK, we experience 4 seasons throughout the year.

They are Winter, Spring, Summer and Autumn.

- Winter**- the coldest season.
- Spring**- starts to get warmer and plants grow.
- Summer**- the warmest season.
- Autumn**- the weather gets colder and leaves fall.
